Overview

With the capability to move 1009 tons per hour, the 875 R-HD E-Series is best at satisfying the most demanding port handling and industrial applications. Through handling piece or bulk goods, the Sennebogen R-HD impresses with its high materials handling capacity, with proven low energy and operating costs that have been further reduced due to the new Green Hybrid recovery system. The 360° swing ring integrated on the lower carriage allows reduced stress and maximum operating comfort.
